

Mission Statement

The Board of Certified Psychometrists (BCP) mission is to provide a certification process for Psychometrists. This is accomplished by continuing improvement and administration of a comprehensive examination that ensures verification of knowledge, minimum competence, and enhancement of professional experience. In addition, the BCP promotes the value of Psychometry along with providing public and professional awareness of quality in Psychometry practice.

Certification for Psychometrists

*National Certification
Professional Recognition*

PsychometristCertification.org

The Board of Certified Psychometrists (BCP) is an independent organization with the mission to administer and manage the Certified Specialist in Psychometrysm examination (CSPe).

The CSP credential is the only North American qualification conferred to those professional Psychometrists who have successfully met the standards of this certification.

Psychometrists administer and score neuropsychological, psychological, personality and academic tests.

Certification ensures a professional level of practice by objectively and quantitatively defining the minimum level of competency and knowledge that is necessary to function as a psychometrist.

Requirements for obtaining the CSP designation

- ◇ Minimum of a Bachelor's degree
- ◇ 2000 -3000 hours of psychological testing experience
- ◇ Verification of professional experience by a licensed psychologist or equivalent

For more information regarding the CSP requirements and to obtain an application, please refer to our website:

PsychometristCertification.org

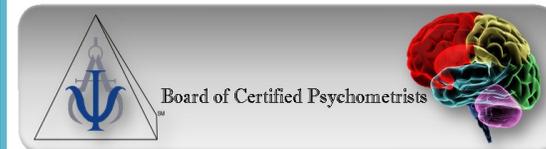

Benefits of obtaining a CSP

- ◇ Authentication & assessment of practice-based knowledge by an independent organization
- ◇ Ensures the highest standard for professional services
- ◇ Enhanced professional credibility and recognition
- ◇ Ability to negotiate improved compensation
- ◇ Professional growth and development
- ◇ Superior job/career opportunities
- ◇ Advanced professional responsibility and visibility
- ◇ Secures standards developed by Psychometrists
- ◇ Supports the promotion of Psychometry as a profession
- ◇ Online verification of certification

Benefits for Employers

- ◇ The only standardized and recognized standard of competence in Psychometry
- ◇ Competitive advantage in promoting services to clients
- ◇ Decreased training time
- ◇ Increased productivity
- ◇ Potentially lower liability and liability insurance premiums
- ◇ Greater likelihood of reimbursement
- ◇ A binding agreement to a Code of Ethics

"In my Forensic Neuropsychology practice, I am frequently questioned in court about the qualifications of the psychometrist. Having a psychometrist with the CSP designation allows me to respond to any legal inquiry in a very concise and authoritative way."

Craig W. Beaver, PhD, ABPP-CN

"Despite my experience, history and references, the certification in particular is what set me apart and got me the job."

Kate Coriano, CSP

"Having a set standard is integral to best practice in any profession. The CSP sets the bar at a time when the field appears to be expanding. Earning this certification demonstrates my commitment to the highest possible standard and will increase my marketability as the field continues to grow."

Julia Biars, MA, CSP

In the Center for Behavioral Health at the Cleveland Clinic, we encourage the Psychometrists to become certified through the BCP. While ensuring the development of a strong skill set, the certification also helps to elevate their professionalism, brings an additional layer of credibility to our team as a whole, and offers each of them a significant career advancement opportunity."

**Daniel Karchmer, Administrator
Center for Behavioral Health
Cleveland Clinic Neurological Institute**

The CSPe is in compliance with the standards for educational and psychological tests published jointly by the American Educational Research Association, The National Council for Measurements in Education and the American Psychological Association. The CSPe was developed in the same method as other professional credentials such as the EPPP and ABPP.
